G POOJA

Karnataka Bangalore- 560068| poojagangadhar7000@gmail.com |

SUMMARY

Motivated MCA graduate with hands-on experience in data analysis using Python. Skilled in data cleaning, manipulation, and visualization using NumPy, Pandas, and Matplotlib. Experienced in performing exploratory data analysis and deriving actionable insights from datasets. Strong understanding of data-driven decision making and eager to contribute as a Data Analyst.

PROFESSIONAL EXPERIENCE

AI Video Editing Intern - DMIF **March 2026 - Present**

- Creating educational videos using AI tools for scripts, visuals, and voiceovers
- Creating engaging videos with transitions, effects, and enhancements
- Creating multimedia content using multiple AI platforms
- Creating high-quality content while collaborating and meeting deadlines

AI Content Intern - Hue Learn **April 2025 - Sept 2025**

- Content Creation Using AI.
- Research and write articles, blog posts, scripts, or learning materials.
- Used Generative AI tools like ChatGPT, DALL·E for content creation and automation.
- Create multimedia content (images, infographics, videos) with AI-assisted design tools.

Python Development - Infotact Solutions **July 2025 - Sept 2025**

- File Organizer – automated script to sort files by type.
- Product Price Tracker – web scraper with price alerts.
- Flask To-Do App – task management web app with SQLite.
- Developed skills in automation, web scraping, and web development using tools such as Python, Flask, BeautifulSoup, SQLite, Git/GitHub, and deployment platforms like Render and Heroku.
- Developed and integrated REST APIs for web application functionality

PROJECTS

Automatic Toll gate **May 2022 - Jun 2022**

From this project, you will learn the most basic things, how to detect a car using ultrasonic sensor and then how to use the servo to open the barrier.

Fruit Disease Detection Using CNN And Transfer Learning **Jan 2023 - Jun 2023**

A Developed a deep learning model using CNN and transfer learning (VGG16/ResNet) to detect fruit diseases from images, enabling early diagnosis and preventive action.

AI for Predicting Social Issues **Dec 2024 - April 2025**

Built a machine learning model using Kaggle crime data to predict trends, identify high-risk areas, and support proactive decision-making.

Smart Task manager with delegation using flask **April 2025 - Aug 2025**

Developed a Flask-based task manager with features like task creation, deadlines, progress tracking, and email-based task delegation, along with file attachments and search functionality.

File Handling Application Using Python **Jan 2026 - Jan 2026**

Developed a menu-driven file handling application in Python to perform operations like creating, reading, writing, appending, replacing, and deleting files efficiently.

SKILLS

Programming: Python

Libraries: Numpy, Pandas, Matplotlib, SQLite 3 (CURD), Seaborn

Web Development: HTML, CSS

AI & ML: Machine Learning

Data Analytics: Tableau (Basics)

Tools: Git, GitHub, VS Code, Jupyter Notebook

PROFESSIONAL SKILLS

Communication	Team Work
Time Management	Collaboration

EDUCATION

Dayananda Sagar University – Master of Computer Applications — **Dec 2023 - Oct 2025**
CGPA: 8.30/10

Dayananda Sagar University – Bachelor of Computer Applications — **Aug 2020 – Oct 2023**
CGPA: 6.44/10

Narayana Pu College - PCMB — **March 2020**
Percentage: 75.5%

Sri Chaitanya Techno School — **May 2018**
Percentage: 64.4%

ADDITIONAL INFORMATION

- **Languages:** English, Kannada, Tamil, Telugu
- **Certifications:**
  - CCST Certification
  - Certified Security Awareness 1 (CSA1)
  - Certified Security Awareness 2 (CSA2)
